

Knox County Solar Project Alert

This is an **ALERT** to inform Knox County residents that an industrial-scale Solar Project is being planned by Frasier Solar LLC, a development arm of Open Road Renewables LLC of Texas. Frasier Solar has been privately meeting with local landowners over the past two years in an attempt to sign 30-40 year farm land leases in Clinton, Miller, and Pleasant Townships just south of Mount Vernon. Open Road Renewables LLC out of Texas has already overseen several other projects in Ohio, including Harvey Solar LLC in Hartford Township, Licking County, which is currently under review with the Ohio Power Siting Board (OPSB). These massive and potentially toxic industrial developments are designed to overrun our rural areas and permanently change the character of these townships.

In 2021, the State of Ohio signed into law Senate Bill 52, giving township and county officials the opportunity to set exclusionary zones to keep industrial scale solar & wind out of rural areas. The Knox County Commissioners will hold a meeting to discuss a resolution to restrict wind & solar projects in the unincorporated areas of Knox County on Tuesday, May **24** @ 10:30am. Farmland currently leased* by Frasier Solar LLC for solar panels and/or easements in Clinton, Miller, and Pleasant Townships are located on the following roads:

Blackjack Rd, Feasel Rd, Granville Rd, Jennings Rd, Kinney Rd,
Murray Rd, Newark Rd, Rangeline Rd, Sharp Rd, Weaver Rd

Visit savehartfordtwp.com for current information about Frasier Solar LLC, what is happening with the Harvey Solar LLC proposed 2,630 acre solar project, industrial scale solar's true risks to rural areas, and the potential damage it can have on your community.
